

# Speed and Scale Without Limits— Everything You Need in One System

Restaurant operations are margin-driven and labor-sensitive, and disconnected systems slow everything down. Genius POS simplifies front- and back-of-house with an intuitive interface, reliable 99.9% uptime, and hands-on, local support from dedicated account managers, not automated responses. Integrate with scheduling, online ordering, and 300+ platforms to keep everything connected and working together.

**No cookie-cutter setups. More flexibility with payments. More ways to run your restaurant your way.**

## More Value. No Added Costs.

*Cut hardware, software, and payment costs with our all-in-one system.*

### 0% Credit Card Fees

Cash discount pricing offsets credit card fees.

### Complimentary Hardware

No upfront hardware cost, ready from day one.

### No-Cost Software

Software included, built for how you operate.

## Run Your Restaurant with More Momentum

### 1. Simple to Get Started

Intuitive software and hardware make it easy to set up, learn, and train, whether you're onboarding new staff or working with experienced restaurateurs.

### 3. Effortless to Scale

Whether you're adding another device or expanding into a new location, Genius makes it easier to scale your system as your restaurant and demand grows.

### 2. Easy to Use

From seating guests to managing the back office, Genius simplifies each role and reduces the effort to keep things running, so you can focus on driving revenue.

### 4. Actionable Customer Insights

Get a 360° view of business insights from every transaction. Understand member and non-member behavior and preferences to create promotions that drive results.

# From First Setup to Ongoing Coverage

## Setting the Foundation

### POS & Menu Programming

Our team will build and program your menu, set up discounts, define staff roles, and prepare your team for day one.

### In-Person Training

Our tech expert will be on-site during your first day to support your team, ensure a smooth start, and resolve any issues.

### Integration Configuration

We set up your integrations to manage scheduling, inventory, accounting, marketing, social media, and daily operations.

### Backup Internet

Our network includes cellular backup if your primary connection fails, keeping transactions running without interruption.

## The Team Behind You

### Nashville-Based Support

Our support team is based in Nashville, TN and offers in-person emergency service as needed within a 300-mile radius.

### 24/7/365 Assistance

We're available at any hour, every day, including holidays, to support your team, resolve issues, and keep service moving.

### Concierge IT Service

IT experts manage your account, delivering personalized support. It's like having your own IT team without adding staff.

### Restaurant Expertise

Our team brings decades of restaurant experience and a clear understanding of the challenges operators face every day.

## Works with the Tools You Already Use

## Real Results. Firsthand Experience.

"Switching POS systems felt overwhelming at first, but the transition was easier than expected from day one. The system is intuitive for staff, simple for ownership to manage, and backed by responsive, hands-on support."
